## EXPERIENCE

---

### University of Windsor

Jan. 2022 – Aug. 2022

#### Research Assistant

Windsor, ON

- Developed a cloud-based data collection and estimation tool for battery performance using **Artificial Intelligence** and **AWS**, programmed with **C++** and **Python**.
- Assisted MASc students in developing data collection tools for the study of Battery Management System (BMS) performance.
- Made a dynamic interface between **I2C/UART** on **Arduino** and **Python** over USB using JSON packets, allowing for real-time data collection and analysis.

### Smyth Innovations

November 2021 – July 2022

#### Embedded Engineer

Chatham, ON

- Developed a custom ECU for an RD400 motorcycle using **EasyEDA** for board design, and **C++** for software development.
- Custom wiring and PCB assembly done by hand.

## PROJECTS

---

### Electric Motorcycle

- Programmed and assembled an electric dirt-bike.
- Assembled using an **Arduino Mega** for control with **C++**, a touchscreen display, custom aluminum panels, isolated inputs and outputs, and **all-custom power distribution and analog sensing**, mounted on a stripped frame.
- This project was my capstone for Electronics Engineering Technology.

### Home Server

- Built a **Docker**-ized home server using **Ubuntu Server**.
- Server hosts services including a **reverse proxy**, a research database, RAID drive redundancy, a Plex media server, **machine learning** models, a minecraft server, cron-scheduled backup scripts, and a web interface for the server. I made this resume on it!

### Electric Long-boards

- Electronics enclosure designed and 3d printed, with custom wiring.
- Batteries are a **completely custom design**, built with 21700 Lithium cells.
- **Won first place** in the hardware category at WinHacks 2021, by passing telemetry over **UART** from the ESC to a **Raspberry Pi**.

## EDUCATION

---

### University of Windsor

Sept. 2020 – Aug. 2022

#### Honours Computer Science with Artificial Intelligence Specialization | Minor in Mathematics

Windsor, ON

- Computer Science **teaching assistant**
- Electrical Engineering **research assistant** working with **Advanced Energy Storage Systems**.
- **89% Major Average**; received Dean's List for most recent completed class year.

### St. Clair College

Sept. 2017 – May 2020

#### Electronics Engineering Technology, Associate Degree

Windsor, ON

- Skills gained involve DC and AC circuit analysis, analog signals processing, digital systems, C language and PLC programming, micro-controller programming and PCB design and assembly.
- **3.9 Cumulative GPA**; received the Student Leadership Award for graduating class year
