

Cole Fuerth – Embedded C/C++

🌐 colefuerth.github.io | 🐙 [colefuerth](https://github.com/colefuerth) | ✉ colefuerth@gmail.com | ☎ 519.300.2877

SKILLS

Languages : Python, C/C++, Java, Rust, Markdown, MATLAB, \LaTeX , bash

Tools : NumPy, Pandas, Jupyter, Docker, PCB Fabrication, Battery Management Systems, Drive Inverters, Git, 3D Printing, Regex, Embedded Systems, Serial/I2C/UART/CAN, Arduino, Linux, PLC/Robotics, RF(433/2.4/BT), Data Acquisition

EXPERIENCE

Satcom Direct Avionics

August 2023 – Present

Embedded Linux Software Developer

Ottawa, ON

- Primarily worked on linux-based networking equipment.
- Wrote an I2C driver for power management.
- Helped build a fork of QEMU to emulate proprietary hardware for software testing.

BMS Labs Windsor

Jan. 2022 – Apr. 2023

BMS Firmware Engineer

Windsor, ON

- Developed a cloud-based database and SOC-estimation tool for Battery Management Systems using Python, as well as a fork of the LibreBMS firmware to collect data over MQTT and test the estimation tool.
- Made a (separate) dynamic interface between **I2C/UART** on **Arduino** and **Python** over USB using JSON packets, allowing for real-time data collection and analysis for thesis projects.

PROJECTS

AI Battery Characterization

- A CNN built with **NumPy** and **Keras** that can characterize messy real-world battery data using the Combined+3 lithium model, an experimental way to estimate remaining charge in batteries.

Electric Motorcycle

- Programmed and assembled an electric dirt-bike.
- Assembled using an **Arduino Mega** for control with **C++**, a touchscreen display, custom aluminum panels, isolated inputs and outputs, and **all-custom power distribution and analog sensing**, mounted on a stripped frame.

Electric Long-boards

- Electronics enclosure designed and 3d printed, with custom wiring.
- Batteries are a **completely custom design**, built with 21700 Lithium cells.

NumpAI

- A hard-coded, fully functional convolutional neural network that can recognize handwritten digits.
- I used **Python** and **NumPy** to implement the neural network on the MNIST dataset.

EDUCATION

University of Windsor

BSc[H] Computer Science with Artificial Intelligence Specialization | Minor in Mathematics

Windsor, ON

- Won first place at both CSGames 2023 for Emulators and WinHacks 2021 for Hardware.

St. Clair College

Electronics Engineering Technology, Associate Degree

Windsor, ON
